

APPENDIX O

Macrophyte Distribution Maps

Because diversity of taxa within beds was great, it was not possible to outline the exact distribution of each species. The following legend places dominant taxa in a general area; the text discusses the location more specifically. The legend for Figs. 1-36 follows (see Fig. 16, for an example of the three types of shading used). In all figures "Potamogeton spp." = narrow-leaf forms of Potamogeton.

Type of Shading

Black

Stippling

Crosshatching

St. Clair River, Figs. 1-9 (1983) and 19-27 (1984)

Scirpus acutus

Chara
Potamogeton spp.

Elodea canadensis
Myriophyllum spicatum
Potamogeton gramineus
Potamogeton spp.
Potamogeton richardsonii

Detroit River, Figs. 10-18 (1983) and 28-36 (1984)

Scirpus americanus
Sparganium eurycarpum
Typha angustifolia

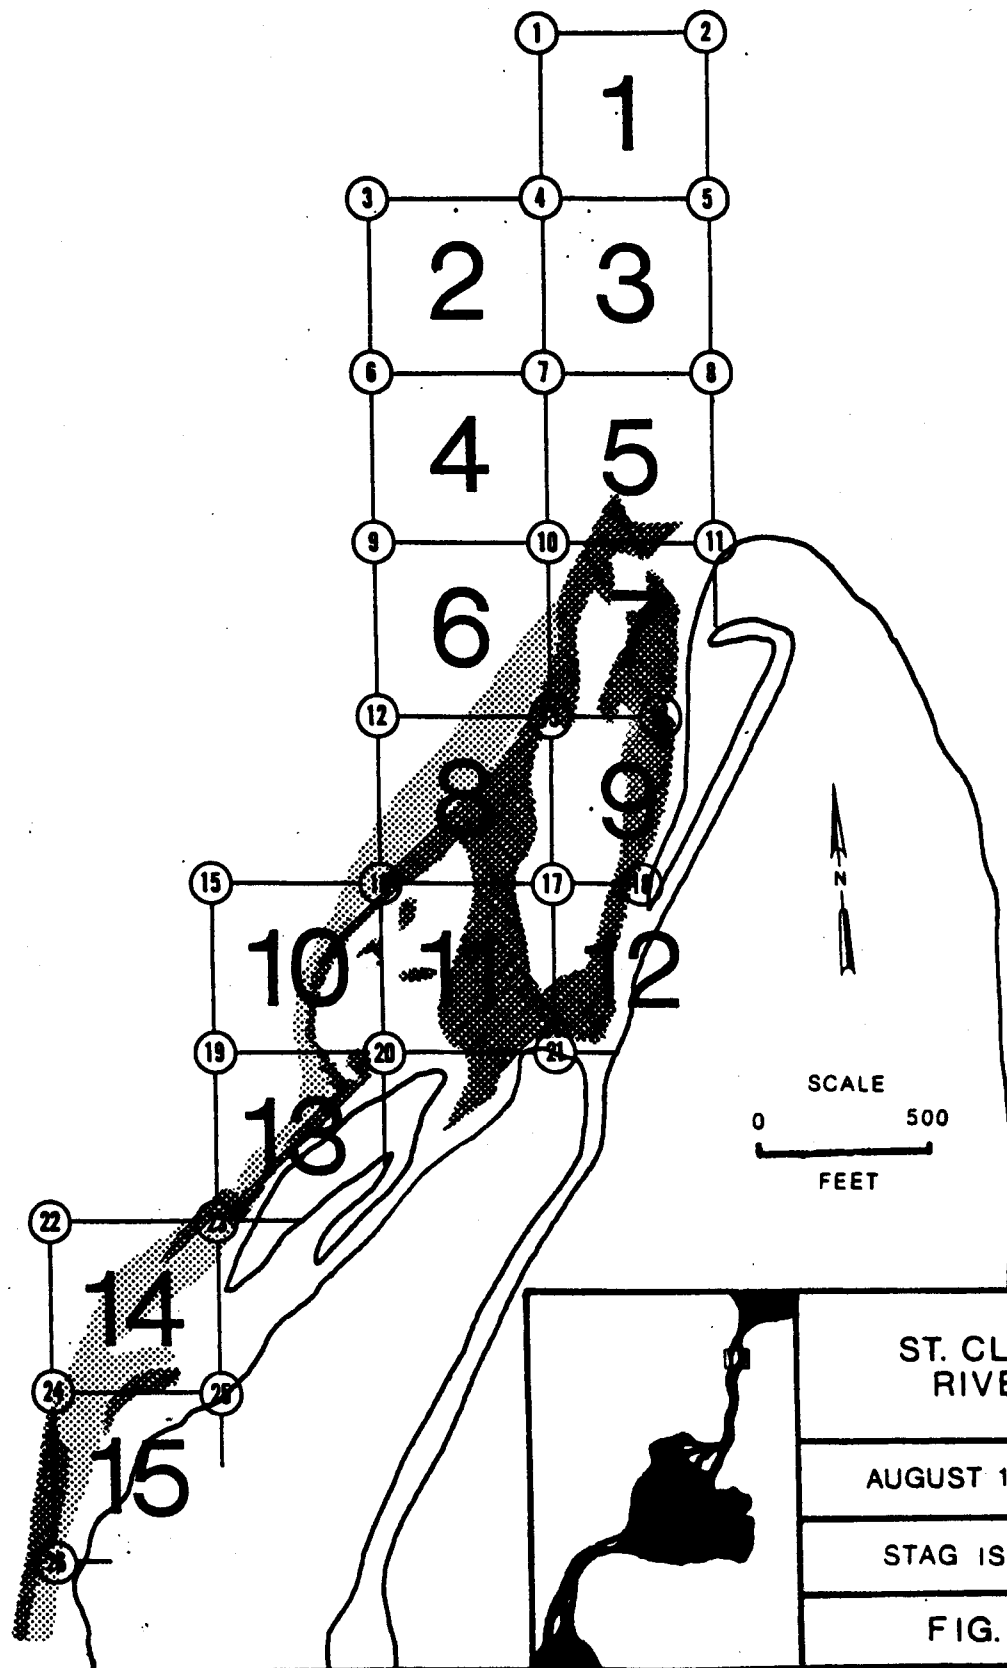

Potamogeton spp.
Vallisneria

Heteranthera dubia
Myriophyllum spicatum
Potamogeton crispus
Potamogeton spp.
Potamogeton richardsonii
